

# Crown

## Sliding Patio Door

The Crown Sliding Patio Door are the key to bringing the outside and inside together. Engineered for strength, stability, performance and aesthetics. These wide opening doors let you enjoy the best views, and with this systems strong yet slim frame design, the light floods in too.

Advanced Aluminium moved to this patio system as it was designed to be the natural replacement for the much loved Monarch patio. We have sold thousands of Monarch Aluminium patios, and feel that this Crown system mimics the look of the original Monarch.

## Key Benefits

- Traditional design with slim sight lines.
- Multi chamber aluminium profiles for strength in tall door situations and improved thermal performance.
- Stainless steel track and wheels giving easy glide operation for all weights.
- Virtually maintenance free
- Dual colour available.
- Advanced Aluminium holds a stock of standard colours, and can supply in a short time scale.

### Hardware

Styling is all about taking care of the details and the handles on your product have been carefully thought through like every other aspect of the system.

New hardware finishes polished gold and polished silver are now available.

### Keeping Winter Out

With multi chamber aluminium profiles Crown doors can provide superior thermal performance just when it matters most. Crown doors can achieve a 1.5 U-value surpassing the requirements of the recently revised Building Regulations Part L 2010.
